

Instructions for patients after having Yag laser capsulotomy

- 1) It is normal to have blurring for the first few hours or the first day.
- 2) Vision is usually back to normal by the next day.
- 3) Spots floating in the vision are to be expected and resolve over several weeks or months.
- 4) Persistent flashing lights, blurring after the first day, any blurry area or darkness in the visual field should be reported immediately to Dr. Hirshfield.
- 5) Mild foreign body sensation, redness or irritation is normal but significant pain should be reported to Dr. Hirshfield immediately.
- 6) Keep your follow-up appointment which is scheduled on _____.
- 7) If you have any questions or concerns immediately call the doctor at:

718-460-1200
